Service Catalog

The Marist Tech Clinic is a student-led team at Marist University that partners with nonprofits and small businesses across the Hudson Valley to deliver real technology solutions, at little to no cost. Below is the full range of services we offer, from free assessments and workshops to advanced, managed security services for organizations that need a deeper level of protection. If you have a need that isn't listed here, let us know: we're happy to talk through it and see how we can help!

Cybersecurity

Service	What's Included	You'll Receive
Initial Technology & Security Assessment	A first look at your current technology and security setup to identify quick wins and bigger risks.	*Checklist + summary report*
Compliance Assessment	A review of your organization against relevant compliance standards to flag gaps before they become problems.	*Compliance summary report*
Cybersecurity Risk Assessment	An evaluation of your systems and practices to identify where you're most exposed to cyber threats.	*Risk assessment report*
Incident Response & Recovery Planning	A clear, step-by-step plan so your team knows exactly what to do if something goes wrong.	*Incident response playbook*
Employee Cybersecurity Training & Awareness	In-person or online training to help your staff recognize and avoid common cyber threats.	*Training slides + videos*

Technology

Service	What's Included	You'll Receive
Infrastructure & Cloud Design + AI	A review of your infrastructure and cloud setup, with recommendations for where AI can improve efficiency.	*Assessment checklist + report*
Network & Device Health Check	A full check of your network and connected devices to catch issues before they cause downtime.	*Health check checklist + fixes*
Software & Vendor Selection	Help evaluating and selecting the right software and vendors for your specific needs.	*Vendor comparison list with use cases*

Software Development

Service	What's Included	You'll Receive
Website & App Usability Review	An expert review of your website or app from a visitor's perspective, highlighting what's working and what's not.	*Usability report + recommendations*
Website Build or Refresh	A full website build or redesign, handled by our team from start to finish. (Hosting and infrastructure costs are covered by the client.)	*A live, functioning website*
Custom Application Development	Custom-built software or applications tailored to your organization's specific workflows. (Paid engagement.)	*A working custom application*

Data & Analytics

Service	What's Included	You'll Receive
Data Cleanup & Organization	We organize and clean up messy spreadsheets and datasets so they're easy to use and trust.	*Cleaned sample dataset + summary*
Data Insights & Dashboarding	We turn your raw data into an easy-to-read dashboard so you can see what matters at a glance.	*Dashboard + insights report*
Data Architecture Review	A review of how your data is structured and stored, with recommendations for improvement.	*Data architecture report + recommendations*

AI Enablement

Service	What's Included	You'll Receive
AI for Small Business Workshop	A hands-on workshop introducing your team to tools like ChatGPT, Claude, and Gemini and how to use them effectively.	*Workshop slides + prompt library*
Workflow Automation	We identify repetitive tasks and help automate them so your team can focus on higher-value work.	*Custom automation template pack*
AI Model Customization	Guidance tailoring AI models to fit your organization's specific needs.	*Customization guidelines + examples*
